ORDER MANAGEMENT

Streamlined Order Orchestration

Integrated order management simplifies the order to cash process.

TimelyBill's order management system automates and streamlines order processing for telecom service providers. Order management facilitates order-to-cash (O2C) processing by eliminating bottlenecks, redundancies and errors.

The order management "template builder" utilizes drag-and-drop technology to create custom data input (fillable forms) screens. These screens can be assigned to individual products, categories, and types.

The screenshot displays the TimelyBill software interface. The top navigation bar includes the TimelyBill logo, a 'Bill Perfect' badge, and a user login status 'LOGGED IN AS PETER LAUREN (S)'. A search bar is located on the right. The left sidebar contains a navigation menu with categories like Customers, Leads, Agents/Partners, File Management, Financial, Fulfillment, Provisioning, Reports, Ticketing, Workflow, Administration, Configuration, and Help. The main content area is titled 'Customer > Orders' and features tabs for Financial Hist., Tickets, Packages, Usage, Orders, and Quotes. The 'Orders' tab is active, showing a 'General' section with various input fields for order details such as Order ID, Quote ID, Created, Modified, Customer ID, Order Date, and Estimated Completion. It also includes fields for Order Status, Order Type, Description, Purchase Order #, Contact Name, Contact Phone, and Contact Email. A 'Notes' section and 'File Management' options are also visible. Below these fields is a table of 'Order Items' with columns for Item ID, Position, Product ID, Product Description, Address, Invoice Gr., Contract, Qty, Recurring, Discount, Total Rec., and Flow. The table contains two rows of data for 'Test Parent' and 'Test Child' items.

Item ID	Position	Product ID	Product Description	Address	Invoice Gr.	Contract	Qty	Recurring	Discount	Discount	Total Rec.	FB	Flow
10029	27	30009	Test Parent		None	None	1.00	10.00	0.00	0.00	10.0000		
10028	26	30010	Test Child		None	None	2.50	0.00	0.00	0.00	0.0000		

TimelyBill's order-to-cash process allows you to assign services & quickly initiate customer billing.
