# PARTNER MANAGEMENT

## Simplify Your Channel Commissions

**TimelyBill supports multi-level channel partner management.**

We empower telecommunications companies to manage partners, distributors, and agent commissioning plans. TimelyBill's software enables the creation of multi-tiered partner hierarchies. Service providers can define commissions (one-time payouts), residuals (recurring payouts), and chargebacks.

Our portal lets your agents view their commissions, disbursements, and compensation payments.

Streamline your commissioning process and let partners view their entire compensation history!

## Our hosted telecom billing system is designed for communications service providers & is ideal for subscriber-based billing.
