# TimelyBill

REPORTS & DASHBOARDS

Integrated Report Tools

Standard or custom reports for your billing operations.

TimelyBill's robust reporting tools help CSPs drive business growth, identify potential problems, and improve overall customer experience. TimelyBill has two different reporting methods to help communications service providers analyze data:

- Custom ad hoc reports and dashboards can be created on the fly via Izenda's embedded Business Intelligence & Analytics Platform.

- Standard canned reports are provided via a library of pre-built SAP Crystal Reports.

TimelyBill's reporting methods provide historical, current, & predictive views of telecom-based business operations.
